

Dedicated. Proactive. Experienced.

The key qualities of our benefit plan audit team

Dedicated team

The employee benefit plans industry is a core industry segment for our practice. At Kevane Grant Thornton, our benefit plan practice professionals specialize in ensuring compliance for employee benefit plans of all sizes. We have experience in defined contribution, as well as in defined benefit plans. Our team takes a proactive approach that helps eliminate ERISA violations and results in timely filings.

Proactive approach

Our benefit plan audit approach results in effectively executed audits. It focuses on the complexities created by the involvement of multiple departments and third-party providers in the audit process. We have extensive experience handling compliance matters that affect both defined contribution and defined benefit plans. Because these issues often slow the audit process, we will effectively identify and communicate them, keeping the audit on track. We also believe that it is our responsibility to drive the process through to completion by holding all parties accountable.

Experience leaders

Our Employee Benefit Plan audit team is committed to providing leadership to the benefit plan audit industry. With vast experience in this sector, our professionals

work with you to address your concerns head-on and actively stay abreast of the issues that affect your plan. We are members of the AICPA Employee Benefit Audit Quality Center.
